

KATIE NGUYEN

Active Interim Security Clearance | Fairfax, VA | katienguyendata@gmail.com | <https://www.linkedin.com/in/ngoc-kha-tu-nguyen/> | <https://katng2886.github.io/>

SUMMARY

Data Analyst with experience owning end-to-end data pipelines and collecting, processing, analyzing, and visualizing data from enterprise-level sources using SQL, Python, Excel, Power BI, and Tableau. Skilled in data quality management and statistical analysis to identify trends and key performance metrics, with a track record of producing recurring and ad hoc reports for cross-functional stakeholders.

PROFESSIONAL EXPERIENCE

LeadingAge | Washington, DC

May 2026 - Present

Data Analyst

- Collect, process, and visualize data from enterprise-level sources, including Salesforce/Nimble AMS, IRS 990 forms, HUD housing data, CMS/CCN provider data, and marketing platforms, using Excel, Power Query, Access, and Tableau, resulting in accurate, decision-ready datasets for organizational stakeholders.
- Design and maintain interactive dashboards and reports, using Tableau, resulting in timely and accurate performance insights delivered to staff and leadership.
- Own the end-to-end Student Membership pipeline, from data verification and eligibility checks through granting membership, ensuring accurate, timely processing and data integrity across the full membership lifecycle.
- Analyze structured and unstructured data from multiple datasets, using statistical analysis and trend identification techniques, resulting in key performance metrics that support operational and business performance monitoring.
- Clean, transform, validate, and label datasets, including verification of Home Health, Hospice, and Skilled Nursing Facility CCNs, using Excel, SQL, and data quality management practices, resulting in reliable, audit-ready data for recurring and ad hoc stakeholder reporting.
- Produce recurring and ad hoc reports for IT stakeholders, translating analytical findings into clear, actionable summaries for non-technical audiences.

Data Quality Assistant

Aug 2025 - May 2026

- Collected, cleaned, and analyzed operational data using SQL and advanced Excel, applying data quality management and cleaning practices while maintaining high-quality data standards supporting reliable reporting.
- Prevented investment in an unreliable third-party dataset by conducting a data quality assessment of 100K+ records, identifying critical accuracy gaps that drove a no-buy decision.
- Created SQL validation scripts to identify billing discrepancies before processing, contributing to 100% billing accuracy and communicating findings to cross-functional stakeholders.
- Collaborated with multiple departments to resolve data questions, maintain consistent business definitions across teams, and support ad hoc reporting requests.

George Mason University – Office of University Branding | Fairfax, VA

May 2024 - May 2026

Database Assistant Student

- Collected, cleaned, and verified 8,000+ records, achieving 100% data integrity for downstream reporting.
- Built data quality protocols and documentation for a new CRM rollout, ensuring record continuity through the transition.
- Developed an Access deduplication tool, achieving 100% data integrity on the new system.
- Migrated legacy Excel databases into the CRM and automated workflows, reducing manual entry errors.
- Interviewed and trained new staff on CRM modules and legacy systems, reducing ramp-up time.

TECHNICAL PROJECTS

U.S. Nursing Home Analysis (Python & Tableau) | [Tableau](#)

Dec 2025

- Cleaned and validated large-scale healthcare datasets in Python (Pandas), identified missing values, inconsistencies and quality issues to improve reporting accuracy; built interactive Tableau dashboards, resulting in identification of key quality metrics and achieving actionable insight for aging-services stakeholders.

Airline Feedback Analysis (Python) | [GitHub](#)

May 2025

- Scraped and analyzed 1,000+ customer reviews using BeautifulSoup and Pandas, resulting in identified sentiment drivers and achieving actionable insight into booking behaviors; built a Random Forest predictive model, resulting in 85% accuracy in assessing booking behaviors and achieving a defensible basis for behavior-driven recommendations.

Northeast Big Data Innovation Hub Certification | [Certification](#)

Jan 2025

- Analyzed U.S. Department of Transportation (FHWA) datasets to identify data quality issues, resulting in visualizations built with Matplotlib, Seaborn, and Folium and achieving clear communication to non-technical audiences.

TECHNICAL SKILLS

- **Languages:** SQL (Oracle, PL/SQL, BigQuery, SQL Server), Python, JavaScript
- **Analysis & Visualization:** Tableau, Power BI, Advanced Excel (XLOOKUP, Pivot Tables), Pandas, NumPy, Matplotlib, Seaborn
- **Data Platforms:** Salesforce (Nimble AMS), Zoho CRM
- **Tools:** GitHub, Jira, MS Project, Microsoft Office

EDUCATION

George Mason University | Fairfax, VA | *Bachelor of Science in Information Technology*

May 2026

- Concentrations: Database Technology, Programming & Cyber Security | GPA: 3.91
- Dean's List | Northrop Grumman Initiative STEM Scholarship (2024-2026)
